

## Foodmax CTL

### Food grade emulsifying seamer fluid

#### Description

Foodmax CTL is a high performance problem solver for use in the canning industry. It is formulated to lubricate main turrets, bearings, chains and gears. Foodmax CTL provides viscosity control in the presence of water and excellent load-carrying properties and corrosion inhibitor to protect seamer components. It works as an emulsifier where contamination of the oil with water, juices and sugar may occur to eliminate free water to prevent from corrosion. Foodmax CTL is made of a high quality paraffinic petroleum lubricating oil with ashless dispersant, rust and oxidation inhibited, anti-wear protection, non-foaming, extreme pressure protection and emulsifier.

#### Applications

Foodmax CTL 150 is specially developed for use in can seamers when a total loss emulsifying lubricant is required.

#### Benefits

- Foodmax CTL absorbs free water and juices and transports this to the recirculation tank for easy removal.
- Foodmax CTL reduces contact staining which can lead to heavy pitting, rust & corrosion
- Foodmax CTL 150 is NSF H-1, Kosher and Halal registered for incidental food contact
- Stable emulsion
- Excellent lubricating properties
- Highly resistant to oxidation

#### Typical performance data

	<b>150</b>
Density @ 20°C, g/ml	0.87
Viscosity @ 40°C, cSt	150
Viscosity Index	118
Flash point °C	>200
Pour point, °C	<-15
Rust Test	Pass
FZG load stage	12
Kosher approved	Yes
Halal approved	Yes
NSF approval	157690

All performance data on this Technical Data Sheet are indicative only and can vary during production
