

Foodmax Inor 3H

Direct contact food grease, release agent & lubricant

Description

Foodmax Inor 3H is a non-toxic spray lubricant designed for optimum lubrication and protection of seals, guides, bearings, blades, and other machinery operating in food & pharmaceutical environments where direct food contact is inevitable.

Applications

Foodmax Inor 3H is designed for use on e.g. mixers, slicers, mincers, seals and where contact with food-stuff cannot be avoided. Foodmax Inor 3H is suitable for use as a release agent on grills, ovens, loaf pans, boning benches, chopping boards and other hard surfaces that come

in contact with food stuff to prevent the adherence during processing.

Benefits

- Packed in aerosol form, easy to apply
- Excellent EP properties
- Wide operating temperature range
- Good sealing properties
- Anti-wear performance prolongs component life
- Suitable for use as a multi-functional grease
- No allergen ingredients

Typical performance data

Colour	White
4-ball, weld load, kg	355
Dropping point, °C	None
Operating temperature range, °C	-10 – 110
NSF registration	148466

Use:

Foodmax Inor 3H Spray should not be mixed with any other lubricant to avoid cross contamination. All traces of any previous lubricants should be removed prior to application. Use in a well ventilated area.

This product contains no allergens, genetically modified ingredients and does not contain nut oil or nut oil derivatives.
